Where would the money come from?	7

Prologue

To my wife Lucia, Daughter Isabella and Son Sebastian.

In my previous book Series The Mighty Power, I explored and created the concepts behind Knowledge and Wisdom. It included the plan to raise humanity's consciousness so we are able to become an interplanetary species.

This book was inspired by the lack of information about key things in life that if we all knew about it , we would be better off and not get hit by setbacks, for example, not reading a contract that spells you are giving away your rights forever. It has happened.

Why this book?

This book is a continuation of our exploration into something bigger.

The first books, Knowledge and Wisdom are the base, the third book Enrich-me deals with how the concepts of Knowledge and Wisdom apply to our daily lives. The fourth book is about HOW we can raise our consciousness to become a Interplanetary species. To do that , we need to UNLEARN certain things ingrained in our society and LEARN new aspects key to our development.

Introduction

Have you ever wondered what would happen if we knew about key things in life that are important BEFORE we get hit by them?

Chapter I

The problem does not resolve in the US or Europe or any rich country.

What is the problem? Why do they keep coming in an endless migration?

There is no work or no way to feed their families and all American movies show how great life is in the US.

They prefer to risk their life's migrating than dying of hunger and doing nothing

A professor demonstrated the fact that 6 billion people cannot migrate to richer countries years ago. <https://youtu.be/LPjzfGChGIE>

Many migrants in the US deep inside want to return to their homeland. But they do not because there is nothing (jobs) back there to return to.

If we create a program to train them (immigrants) and fund (microcredits) partially their return to create businesses and create jobs in their home land, that would greatly reduce large migrations all over the world. They need knowledge and money to create businesses that create jobs. They already know the language and culture.

Where would the money come from?

1. The affected country with inmigration. (25%)
2. The home country where people want to return. (25%)
3. The United Nations / Crowdfunding (25%)
4. Individuals returning to their homeland. (25%)

How much money do you require to start a business? That depends on the country, but generally speaking, and depending on the activity, you need 5 to 15 thousand dollars per project to start. As an example, in Colombia, 15.000 dollars equates to 60 million pesos. You can start any kind of business with that money. The key is not to give the actual money to the individual, but a credit card, so they can buy all the necessary items needed, and so that there is a log of

expenses that can be audited. The idea is to start with a small number of projects, and grow steadily over time.

A friend of mine told me about how to fix world hunger and poverty. The problem relies on people not being able to generate income to feed their families or themselves. No jobs: Poverty and hunger. What do we want to create? Jobs for adults, education for children so they can survive in this world with Knowledge, because we depend on it to thrive.
